Professional Summary

Information Technology graduate (B.E., 2026) targeting Java Backend Developer roles. Developed StyleSync, a full-stack fashion e-commerce application using Java 21, Spring Boot, Spring Security, JWT authentication, and PostgreSQL. Experienced in building REST APIs, implementing authentication and authorization, managing databases, and writing unit tests. Familiar with Core Java, Object-Oriented Programming, REST API development, and backend application development.

Technical Skills

Programming Languages: Java, Core Java, SQL
Frameworks and Libraries: Spring Boot, Spring Security, Spring MVC, Hibernate, Spring Data JPA, JDBC
Backend Development: REST APIs, JSON, JWT Authentication
Databases: PostgreSQL, MySQL
Development Tools: Git, GitHub, Maven, Docker, Postman, IntelliJ IDEA, Eclipse, VS Code
Testing: JUnit 5, Mockito
Core Concepts: Object-Oriented Programming (OOP)

Education

Konkan Gyanpeeth College of Engineering, Karjat **2022 – 2026**
Bachelor of Engineering in Information Technology *CGPA: 7.75/10*

Projects

StyleSync: Fashion E-commerce Application Live Demo | Link | GitHub
Java 21, Spring Boot, Spring Security, JWT, PostgreSQL, JUnit 5, Mockito, Razorpay, HTML, JavaScript

- Independently designed and developed a full-stack fashion e-commerce application featuring a Spring Boot REST backend, PostgreSQL database, HTML/JavaScript storefront, and admin panel.
- Implemented secure authentication and authorization using Spring Security and JWT with USER and ADMIN roles, including forgot-password and password-reset functionality.
- Developed product catalogue features with search, sorting, and pagination, along with role-based product management for administrators.
- Integrated shopping cart, Buy Now, and checkout workflows supporting Cash on Delivery, Razorpay test mode, and order tracking.
- Implemented order management, delivery-address snapshots, and order status updates from Placed to Delivered.
- Applied payment security by retrieving product prices from the database instead of trusting client-side values, and used BigDecimal for monetary calculations.
- Wrote unit and integration tests using JUnit 5 and Mockito to validate application functionality.

GestureVoiceAI: Hand Gesture to Speech System | GitHub
Python, OpenCV, MediaPipe, TensorFlow, Keras, pyttsx3

- Collaborated on a final-year team project that recognizes 42 hand gestures, including digits, common words, and letters A–Z, through a webcam and converts recognized gestures into spoken sentences.
- Used MediaPipe to extract 21 hand landmarks and a trained TensorFlow/Keras model for gesture classification with confidence scores.
- Integrated pyttsx3 for text-to-speech output and worked with dataset collection, model training, real-time gesture detection, and GUI development.

Certifications

- **TCS iON Career Edge – Young Professional** (June 2026): Communication, presentation, resume writing, interview skills, business etiquette, problem-solving, IT fundamentals, and AI overview.
- **AI for Students: Build Your Own Generative AI Model** – NxtWave AI Workshop (Participation, 4 February 2025).

Achievements

- Participant, **Smart India Hackathon 2026**.
